

Clients

Bereskin & Parr's direct clients range from small start-up operations and individual inventors to large Canadian and multi-national corporations, including Fortune 500 companies and some of the biggest intellectual property rights owners in the world. We serve all of their IP needs, including managing worldwide trademark and patent portfolios. The firm also represents universities, hospitals and research facilities, which have complex cutting-edge scientific and technological inventions.

Our clients' businesses include computer hardware and software, engineering and manufacturing equipment, biomedical,

biotech and pharmaceutical innovations, agricultural inventions, telecommunications, retail services, clothing, food and consumer goods.

The firm's global reputation and strong commitment to customer service have allowed us to establish trusted relationships with leading foreign law firms around the world.
